

Abdisa Merga

Summary

My first experience with computer coding was when I was in grade 7 attending an Idea Factory competition. Despite being up against participants from all over Africa, I managed a third place finish in the competition! This inspired me to pursue further development of my skills in this domain and work towards meaningful applications of these studies. I started on the journey of learning different programming languages and took certificates from renowned organizations like Google, IBM and Stanford. Through these certifications, I worked specifically on Artificial Intelligence and Machine Learning with Python and Data Science. The additional certificate accredited by Google was about advanced data analysis which further enhanced my commands for technology related innovations. From Stanford alone I managed to get five certificates that assisted me with research on medical imaging and its relation with human health besides enabling me access aspects like signal processing and deep learning tools.

Experience

Software Developer- 09/2020 to current
Hawassa, Ethiopia

- Include developing and maintaining web scraping scripts, analyzing data to uncover trends and insights, and using predictive analytics to determine how our companies can improve its products and services. Develop project concepts and maintain optimal workflow.
- Work with senior developer to manage large, complex design projects for corporate clients.
- Researching new methods and technologies that can be leveraged to enhance the accuracy of our data collection and analysis.

Education

High School: BNB Learning Center 2011 – 2014(2019 – 2022)
Bachelor of Science: Pre Engenerring - 2023
Hawassa University, HU

Certifications

Python 101 for Data Science A course on cognitiveclass.ai Powered by IBM Developer Skills Network

Machine Learning with Python A course on cognitiveclass.ai Powered by IBM Developer Skills Network

Advanced Google Analytics From Google

Stanford Medcast Episode 43: Hot Topics Mini-Series - Stem Cell Therapy in Multiple Sclerosis from Stanford Medical
